Installation

Ceiling suspended chandelier for indoor and under canopy installation.

Technical description

Main body made up of 2 or 3 thermoformed acrylic sheets shaped as stretched cones and aligned concentrically with a stainless steel pipe.

Thermoformed cones are painted with a special bronze colour used in the automotive field or in white; other colour upon request are available.

Bottom small aluminium cone for indirect lighting.

Top external aesthetic ring made of a laser cutted steel sheet and painted with polyester powder.

Hanging system with a rigid stainless steel rod or a suitable chain.

Electrical features

Apakura 3: 2nos rings with mid power LED, 130W.

Apakura 2: 1 no rings with mid power LED, 40W.

Both are equipped with a 7W LED module, in the pending cone.

Power supply integrated or remotized for an easier maintenance.

Source type

Mid-power LED + Power LED
